Calibration: 3-4-2014, Standards: ASTM E4

As of this date the lifting device described above has been found to be of acceptable condition. It is understood that this test does not preclude the necessity to perform frequent and periodic inspections in conjunction with a regular maintenance program in accordance with manufacturers specifications and/or federal, state and local guidelines. As applicable this test does not constitute a warranty or guaranty of the performance of the above equipment. Slings meet or exceed ANSI/ASME B30.9 and CFR29 1910.184 Standards. I certify that the above described lifting sling (device) has successfully completed load testing IAW contract or purchase order requirements and the information contained in this document is to the best of knowledge and belief accurate and complete.
